

UNDER SECRETARY OF DEFENSE  
1100 DEFENSE PENTAGON  
WASHINGTON, DC 20301-1100

COMPTROLLER

APR 28 2009

The Honorable Ike Skelton  
Chairman, Committee on Armed Services  
U.S. House of Representatives  
Washington, DC 20515

Dear Mr. Chairman:

The American Recovery and Reinvestment Act of 2009, Public Law 111-5 (the Recovery Act), was designed to stimulate economic growth by creating millions of jobs through investments in infrastructure improvements and expanding energy research in an effort to lead the way toward energy independence for our country.

To implement the Recovery Act, the Department of Defense has identified specific investments in construction, facility improvements, and energy efficiency projects. In its March 20, 2009 report, the Department provided a list of over 3,300 projects with an estimated cost of \$3.4 billion for Facilities Sustainment, Restoration, and Modernization (FSRM) funded under Division A, Title III of the Recovery Act—representing about 80 percent of the total FSRM funds appropriated to the Department of Defense. Enclosure 1 provides a list of 856 projects associated with the remaining 20 percent (\$835 million) of FSRM funds provided by the Act.

The projects in the report will be executed on installations located in 37 states and the District of Columbia, and will perform needed repairs and upgrades in a variety of facilities, increase energy efficiency, upgrade utilities systems and improve quality of life, especially for our single service members living in barracks. The following table provides a summary of the costs and numbers of projects by category:

Project Category (Code)	Cost Estimate (\$000)	Number of Projects
Energy-related (E)	\$345,929	338
Roof repair/replacement (R)	\$37,324	92
Utilities (U)	\$50,289	53
Pavement, roads or grounds (P)	\$152,819	91
Barracks (B)	\$69,849	74
Quality of Life (Q)	\$18,836	28
Operations (O)	\$160,427	180
<b>Total</b>	<b>\$835,473</b>	<b>856</b>

As with the initial report, this letter further provides the Congress, pursuant to section 2811 of Title 10, United States Code, with notification that the Department will be conducting repair projects greater than \$7.5 million for nine projects (Enclosure 2). The Department will ensure any statutory notice and wait periods are followed before obligating funds provided under the Recovery Act.

In addition to the final projects submitted herein, this report also provides notification of project changes in Hawaii, Tennessee and New York. Enclosure 3 provides project-level detail for these actions.

This notification and the initial March 20, 2009 report represent the Department's current plan, subject to amendment if significant changes occur during implementation. The Department of Defense appreciates the continued support of the Congress for Defense facility and infrastructure programs. Similar letters have been sent to the chairmen and ranking members of the House and Senate Armed Services Committee and the Committees on Appropriations of the House and Senate.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert F. Hale". The signature is written in a cursive style with a large, prominent "R" and "H".

**Congressional Notification under Title 10 U.S.C. 2811  
Operation and Maintenance Funded Projects in Excess of \$7.5 Million**

**Projects Requiring Notification**

Pursuant to Section 2811 of Title 10, United States Code, the Department of Defense intends to proceed with the nine Army FSRM projects shown below funded with the Operation and Maintenance appropriation. These projects will be executed using a portion of the \$4.3 billion available for the facility repair and modernization and enhancing energy efficiency in the American Recovery and Reinvestment Act of 2009.

***Chilled Water Distribution System, Fort Stewart, GA – Estimated cost of this project is \$24.0 million.***

Description: This project will complete the repair, by replacement, of the existing chilled water distribution system with a combination of direct buried insulated piping and shallow trench piping. The project will install piping in the existing high temperature water shallow trench system in the 500 and 600 block and direct buried piping in the 200, 300 and 400 blocks. The project also includes the renovation of the mechanical rooms piping and associated equipment to current standards enhancing energy efficiency.

***Repair Building 316 Electrical, HVAC, Plumbing, Finishes, Doors, Windows, Aberdeen Proving Ground, MD – Estimated cost of this project is \$9.4 million.***

Description: This is a renovation of Building 316 which houses computer servers for units and organizations on the installation and provides space for Directorate of Information Management (DOIM) support personnel. This project will repair, by replacement, building systems to include the roof, interior finishes, heating, ventilation, air conditioning, electrical, fire protection, plumbing, generator, uninterruptible power supply (UPS), interior access and egress. The exterior work includes loading dock, entrance steps/ramp and fence.

***Repair Admin Bldg I-3571 Finishes, Electrical, HVAC, Plumbing, Doors and Windows, Fort Bragg, NC – Estimated cost of this project is \$11.0 million.***

Description: The project will repair, by replacement, facility components to ensure reliable operation for the remaining life of the facility. Work includes

repair and replacement of HVAC systems to maintain ambient temperatures of 75 degrees (cooling season) and 65 degrees (heating season); repair and replacement of mechanical systems (pumps, valves, controls) to ensure reliability and compatibility with replacement units; repair and replacement of major roofing systems to provide a leak-resistant facility; replacement of plumbing fixtures, piping, and support equipment to ensure dependable reliable and safe operation; replacement of all exterior doors and hardware and interior doors as required to provide for a secure environment; removal of mold and mildew on floors, walls, and ceilings that is beyond normal cleaning; repair and replacement of flooring and suspended ceiling systems; installation of energy efficient lighting; repair and replacement of windows to improve environmental conditions and save energy; and replacement of electrical and communication systems to support a modern office environment.

***Repair B730 Snow Hall Latrines and Building Components, Fort Sill, OK – Estimated cost of this project is \$11.2 million.***

Description: This project will repair, by replacement, building systems to include heating, ventilation, plumbing, electrical, and fire protection systems. The project will also include replacing latrines, chalkboards, white boards, lighting, and interior finishes. The work will include upgrading the building to current anti-terrorism and force protection standards.

***Repair Training Area Unpaved Tank Trails, Fort Bliss, TX – Estimated cost of this project is \$60.0 million.***

Description: This project will repair, by replacement, components of the unimproved tank trails located within Dona-Ana, South McGregor, and McGregor/Oro Grande Range compels on Fort Bliss. These repairs will critically support 4 heavy and 2 infantry brigade combat teams, a fires brigade, and several other units/organizations that have already arrived at Fort Bliss. The current tank trails have not had significant repair or maintenance for many years, and the drastic increase in troop population at Fort Bliss due to BRAC and Grow the Army decisions have made the timing of these repairs an immediate requirement. Units that are training to maintain combat readiness and prepare for imminent deployment to Operation Iraqi Freedom and are required to traverse these tank trails to access training areas and ranges. These repairs will redress safety and accessibility issues that have arisen due to deferred maintenance and repair.

***Repair War Road, Fort Bliss, TX – Estimated cost of this project is \$10.0 million.***

Description: This project will repair, by replacement, components of War Road. The War Road is the main connecting highway between Ft. Bliss and White Sands Missile Range (WSMR) cantonments. This road is used by approximately one-third of the WSMR civilian workforce with an average of one serious accident per month. In addition, approximately one-quarter of all commercial vehicles servicing WSMR use this road. With the arrival of the First Brigade combat teams, this road will become the major thoroughfare for the Heavy Equipment Tactical Transporters (HETTS) transporting tanks to and from the training ranges. The work will consist of repairing paved road shoulders, milling the existing asphalt pavement, and applying an asphalt overlay to the existing pavement to improve its structural integrity.

***Repair Building 422, Finishes, Electrical, Latrines, HVAC, Fort Hood, TX – Estimated cost of this project is \$8.1 million.***

Description: This project will repair, by replacement, building systems to include the interior finishes, heating, ventilation, air conditioning, plumbing, electrical, fire protection systems, interior access and egress. The work will include bringing the building up to current anti-terrorism standards and removing hazardous materials.

***Repair Power Plant & Replace Failed Generators, Dugway Proving Grounds, UT – Estimated cost of this project is \$7.5 million.***

Description: This project will repair, by replacement, the WWII surplus submarine generators which have been out of service for several years with new large generators. The larger generators are capable of providing emergency power to the entire installation and reduce maintenance and repair cost. The current emergency power is provided by generators on long-term lease through the 279<sup>th</sup> Engineer Battalion (Prime Power).

***Renovate Bldg 249 for Company Headquarters, Fort Myer, VA – Estimated cost of this project is \$8.7 million.***

Description: This project is a renovation of Bldg 249. The project will repair, by replacement, building components to include exterior elements of the deteriorated and historic brick of the Unaccompanied Personnel Housing (UPH)/Company

Headquarters facility. Repair work will include roofing, windows, exterior doors, paving for road and sidewalks surrounding the building, landscaping, and lighting. Work will also include repair of chimneys, and repair/cleaning/re-pointing of exterior building facade and structures to closely resemble original construction. These items will be repaired to current standards. This project was developed to restore the exterior of the failing facility.

**American Recovery and Reinvestment Act of 2009  
Facilities Sustainment, Restoration, and Modernization Project Replacement List**

Project Removed: The location of the Army Hangar Apron and Pavement Restoration is corrected.

Installation/Location		State	Project Title	Cost Estimate (\$000)	Project Category
